

**Delta Dental of Virginia Clinical Policy #901**
**Subject**

Palliative (Emergency) Treatment of Dental Pain – Minor Procedure

**Originating Department**

Clinical Professional Services

**Signature Authority**

Dental Director

**Type:**       New                       Replacement                       Revision                       Clarification

**Date:**                      11/15/2009                      **Revision Date:**
**Preamble:**

The Clinical Policy Bulletin is an expression of Delta Dental of Virginia's (DDVA) determination regarding whether certain services or supplies are medically or dentally necessary. DDVA bases its conclusions on a review of currently available clinical literature. This includes, but is not limited to, clinical outcome studies published in the peer-reviewed medical and dental literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians and dentists practicing in pertinent clinical areas, and other applicable information. DDVA reserves the right to revise these policies as new clinical information is available and we welcome submission of further relevant information.

A group may define covered dental services under their dental plan, as well as those services that may be subject to dollar caps or other limits. The plan documents outline covered benefits, exclusions and limitations. DDVA advises dentists and subscribers to consult the plan documents to determine if there are exclusions or other benefit limitations applicable to the service request. The conclusion that a particular service is medically or dentally necessary does not constitute an indication or warranty that the service requested is a covered benefit payable by DDVA. Some plans exclude coverage for services that DDVA considers either medically or dentally necessary. When there is a discrepancy between DDVA's clinical policy and the group's plan documents, DDVA is to defer to the group's plan documents as to whether the dental service is a covered benefit. In addition, if state or federal regulations mandate coverage then DDVA will adhere to the applicable regulatory requirement.

**History:**

An emergency is a serious situation or occurrence that happens unexpectedly and demands immediate action. In dentistry, palliative treatment is considered emergency treatment that alleviates pain. The code is reported per visit, not per tooth serviced, and cannot be reported under its own procedure code. The treatment includes all services other than necessary X-rays for this procedure.
