Healthy Smile, Healthy You enhanced with services for additional health conditions

The importance of preventive dental care becomes more apparent with every passing year. Research continues to find connections between good oral health and a healthier overall body. Since its inception, our Healthy Smile, Healthy You® program has stressed the importance of routine dental care by providing additional cleanings and exams for members who are pregnant or have diabetes. Effective January 1, 2010, Delta Dental will begin providing one additional cleaning and exam to members who have been diagnosed with High Risk Cardiac Conditions.

Beginning January 1, 2010, members with the following cardiac conditions will be eligible for one additional cleaning and exam (or periodontal maintenance procedure if the employee has a history of periodontal surgery) beyond the ordinary limit per benefit period.

- A history of infective endocarditis
- Certain congenital heart defects (such as having one ventricle instead of the normal two)
- An artificial heart valve, pulmonary shunts or conduits
- Hypertrophic cardiomyopathy
- Heart valve defects caused by acquired conditions
- Mitral or aortic valve prolapse

We strongly believe in the clinical studies that have found that a mouth free of gum disease can reduce the risk of preterm, low birth weight babies, as well as help members with diabetes control their blood sugar levels. Now, we want to extend this same benefit to members with cardiac conditions in an effort to decrease the risk of oral bacteria infecting their hearts. As with all Healthy Smile, Healthy You conditions, eligible employees must enroll to receive coverage.

Updated enrollment forms and Healthy Smile, Healthy You communications materials will be available in the Healthy Smile, Healthy You section on deltadentalva.com. You can reach the Healthy Smile, Healthy You section from any of the Connection pages or from the Oral Health Resource Center. Printed break room posters and employee flyers will also be available upon request.

Please note that Healthy Smile, Healthy You is included as a standard feature in all pool and experience-rated group plans with Delta Dental PPO® and Delta Dental Premier® coverage. ASO (self-funded) groups with Delta Dental PPO and/or Premier coverage may choose to include Healthy Smile, Healthy You in their plans, as well. DeltaCare® plans do not include Healthy Smile, Healthy You. For more information about Healthy Smile, Healthy You, please contact your Delta Dental sales representative.
Employer Connection website reports make your job easier

Users of our interactive Employer Connection website have provided very favorable feedback on the tools and resources they can access through the secure, password protected area of deltadentalva.com. One of the most valuable, and time-saving features mentioned is the suite of in-depth reports available to registered users.

Once logged into the Employer Connection on deltadentalva.com, you can access a variety of helpful reports that allow you to review and analyze your dental benefits program – all at your convenience, with a few clicks of the mouse. When visiting the Management Reports section of the Employer Connection, you will find:

- Quick Look Report – Contains the most frequently requested group summary information
- Executive Summary Report – Outlines key high level performance facts
- Claim Summary Report – Provides detailed information on claims submitted
- Member Age Distribution Report – Shows a graph of enrolled members by age
- Network Utilization Comparison – Identifies details of all Delta Dental network and non-network provider usage
- Dentist Payment Distribution Report – Profiles which dentists have been utilized the most
- Cost Containment Report – Details each cost containment feature of Delta Dental’s comprehensive cost management program
- Claims Utilization Report – Provides a detailed breakdown of how dental benefit dollars have been applied by service categories, including average cost per procedure and member type
- Claims Utilization by Member Report – Provides a detailed breakdown of how dental benefit dollars have been applied by service categories and member type
- Claims Utilization by Network Report – Provides a detailed breakdown of how dental benefit dollars have been applied by service categories and network status
- Claims Incurred and Claims Paid Report – Shows the lag between the month the claim was incurred and the month the claim was paid

All reports are available by a user-defined date range and within different company grouping. You can choose aggregated reports for all group numbers within your group, reports on all sublocations within a group number, or individual reports by benefit plan.

If you aren’t already registered to access the secure Employer Connection, it’s easy to get started. Simply visit deltadentalva.com and click the Employer Connection link on the left navigation. This brings you to the Employer Connection page where you can click on the website authorization form link in the FAQ box on the right side of the page. The form will appear as a PDF file in your web browser. Follow the instructions to complete and submit the form to Delta Dental.

You will receive two separate emails with your user name and password once we have completed your enrollment. If you would like more information or assistance with the Employer Connection website, please contact Delta Dental sales representative or call our Marketing department at 888.335.8216.

New Delta Dental welcome video available

A brand new video is available at deltadentalva.com that will introduce you and your employees to Delta Dental. Watching this video will teach you the value of having dental coverage with one of the most trusted names in dental benefits. The video will explain Delta Dental’s:
- Expertise – we were founded by dentists
- Network – we have the nation’s largest network, with three out of four dentists participating
- Cost Savings – our dentists charge predetermined fees and don’t balance bill
- Customer Service – we handle 75 million claims per year, with 99 percent accuracy
- Community – we focus on improving the health of the public with oral health grants, scholarships and educational programs

To view this video, visit deltadentalva.com and click on the Welcome Video link. Taking a few minutes to view this interesting video will provide you with a good understanding of how Delta Dental’s unmatched expertise, largest network and dedicated service keeps your smile healthy and you happy.

Online risk assessment tool launched

A new online tool is available to help individuals assess their risk of dental disease. This interactive online tool asks a series of yes or no questions, and educates users on how health-related issues like diabetes, prescription medication and un-fluoridated water can affect oral health. When the assessment is completed, a comprehensive report is generated and the user will be prompted to schedule a dental visit to review the assessment results with their dentist.

The online risk assessment tool is available to everyone who visits deltadentalva.com. Simply click the links found on the Subscriber Connection or Oral Health Resource Center pages to take the quick, nine-question survey. It only takes a few minutes to complete, but offers a wealth of oral health information for your employees to share with their dentists.

Designed to educate employees about their personal risk factors, taking this quick and simple test can help them understand their susceptibility to oral health problems, methods to reduce their risk and the importance of taking care of their teeth.

Webcast showcases commitment to advancing oral health care

Over the years, Delta Dental of Virginia has been a driving force in the study of advanced oral health care initiatives, and researching the link between good oral health and overall body health. Leading the way in this scientific research is Delta Dental’s Dr. Max Anderson. See what he has to say about some of the significant advances being made in an online webcast you can view at deltadentalva.com. Click the link under “Scientific Breakthroughs”.

Dr. Max provides details on Delta Dental’s funding of research to:
- Find a simple and easy solution to the infection that causes cavities, and develop solutions to re-grow a tooth and reverse bone loss

You’ll also learn how Delta Dental uses claims data from the millions of patients in the Delta Dental system to predict better outcomes and redesign programs to take advantage of procedures and cost savings.

These are just a few of the many initiatives Delta Dental supports in an effort to bring a better understanding of and outcomes for the two most widespread diseases in oral health – cavities and periodontal disease. We do envision a world free of cavities – and we are convinced the dental system to predict better outcomes and redesign programs to take advantage of procedures and cost savings.
